www.alumnoservices.com

Alumno is an education center, which provides professional one-on-one tutorial services to Elementary, High school, College and University students in every subject.

Our purpose is to work with students who want to maintain their grades to remain a level ahead of their studies, in addition to those who have fallen behind in their classes.

We start by evaluating each student, to appraise their present acumen to the fullest extent. We then prepare a customized tutorial plan for each student that concentrates on enhancing those aspects of academia upon which it is considered that the greatest attention is required. We have designed and developed effective tutorial programs with one-on-one individual attention, to assist and guide each student to achieve success during the course of their education. We continuously achieve an advantage over industry competitors by expanding our professional staff and investing in up-to-date materials and allied resources.

Our highly qualified tutors understand the importance of an exceptional education and how vital it is in influencing a student's future. We have found that in many cases, obstacles begin when students are reticent and shy to ask questions in front of their classmates, and teachers who are dealing with increasing class sizes. The reason Alumno Tutorials are so effective, is largely due to the personalized individual tuition they provide. Also, they focus on making the learning process an interactive activity.

By doing so, this motivates the student to expand their learning, and allows for a comfortable interaction with their personal tutor throughout each session.

This facilitates a quicker and more thorough understanding of the subject and enables each student to gain lifelong skills in critical thinking, analyzing, communication and organization; qualities crucial to a successful future. If knowledge of all these are not acquired during the formative years of education, the resulting academic weakness can have a significant adverse impact on their subsequent career and, even more importantly, undermine their self-confidence.

Summer Programs

- Offered Year Round
- Individual or Group Crash Courses for students who wants to master their summer school exams

High School Entrance Preparation

This preparation course will drastically increase the student's probability of receiving acceptance to the school or program of their choice. The specialized course focuses on key concepts while reviewing 7 intensive modules of similar exam preparation curriculum.

- Specialized tutorial sessions for grade 5 and 6 students who plan on attending a private school, French immersion or an IBO program. Preparation curriculum specifically adapted
- Currently with a 90% acceptance rate
- Includes practice exams and interview prep
